[Invitation To Pilot Program](#)

**The following invitation letter is intended for
The Accountability Badge Pilot Program applicants.**

TO WHOM IT MAY CONCERN:

Our Company is testing a new law enforcement badge called The Accountability Badge. We believe The Accountability Badge will help restore relations between officers and citizens, validate the good in officers through the option to rate and review, honor fallen officers through a real memorial with a fundraiser for their families, send emergency or co-responder help through a unique chat with dispatch feature, and end impostor abductions by enabling citizens to verify an officer's identity before interaction. The Accountability Badge helps track credible abuses within law enforcement and correlates directly with the initiative signed by the executive order from The President Of The United States.

Our company has accomplished this by installing an NFC (near frequency communication) chip inside of a police badge. This badge allows citizens to ask an officer for badge information; the officer simply removes their velcro badge, either holds the badge in their hand or places it up to the window of a vehicle, and through NFC technology, the citizen may tap their phone on the badge— instantly receiving true, real, life-saving information from the very badge law enforcement stands behind.

We are looking for volunteers to help evaluate The Accountability Badge and then provide us feedback about their experiences. Similar pilots in other locations show that most people have a positive experience. But we want to be sure that The Accountability Badge fits into our unique environment.

If you would be interested in participating and providing feedback, please fill out the attached application for review.

Thank you for your time in reviewing this opportunity. Let's work together to help create a better future, restore relations between law enforcement and citizens, and create a sense of Accountability & Pride for every officer wearing The Accountability Badge.
